S. No.	GIGW Requirement	Observation
22	5.1.22 API integration with key government platforms (India Portal, DigiLocker, Aadhaar, Single-Sign-On, MyGov, Data Platform, MyScheme) and similar websites of the government organisation must be enabled for seamless exchange of Information and data	No API Integration with key government platforms found on the website.
02	5.2.2 For pre-recorded audio-only and pre-recorded video-only media, the following are true, except when the audio or video is a media alternative for text and is clearly labelled as such: 1) Pre-recorded Audio-only: An alternative for time-based media is provided that presents equivalent information for pre-recorded audio only content. 2) Pre-recorded Video-only: Either an alternative for time-based media or an audio track is provided that presents equivalent information for pre-recorded video-only content.	No Audio only/Video only Content is available on the website that is directly hosted within the website's directory. Hence, text for any audio only/video only media is not applicable.
03	5.2.3 Captions are provided for all pre-recorded audio content in synchronized media, except when the media is a media alternative for text and is clearly labelled as such.	No Audio/Video based content is available on the website that is directly hosted within the website's directory. Therefore, captions for pre-recorded audio content in synchronized media are not applicable.
04	5.2.4 An alternative for time-based media or audio description of the pre-recorded video content is provided for synchronized media, except when the media is a media alternative for text and is clearly labelled as such.	No Audio/Video based content is available on the website that is directly hosted within the website's directory. Hence, providing an alternative for time-based media or audio description for pre-recorded video content is not applicable.
05	5.2.5 Captions are provided for all live audio content in synchronized media.	No live audio/video content is available on the website that is directly hosted within the website's directory. Therefore, this requirement is not applicable.

06	5.2.6 Audio description is provided for all pre-recorded video content in synchronized media.	No Audio/Video based content is available on the website that is directly hosted within the website's directory. Therefore, providing audio descriptions for pre-recorded video content is not applicable.
13	5.2.13 If any audio on a Web page plays automatically for more than 3 seconds, either a mechanism is available to pause or stop the audio, or a mechanism is available to control audio volume independently from the overall system volume level. c) Real-time Exception: The time limit is a required part of a real-time event (for example, an auction) and no alternative to the time limit is possible; or	No audio content that plays automatically is available on the website. Therefore, mechanisms for pausing, stopping, or controlling audio playback are not applicable.
23	5.2.23 If a keyboard shortcut is implemented in content using only letter (including upper- and lower-case letters), punctuation, number, or symbol characters, then at least one of the following is true: 1) Turn off: A mechanism is available to turn the shortcut off 2) Remap: A mechanism is available to remap the shortcut to include one or more non-printable keyboard keys (e.g., Ctrl, Alt). 3) Active only on focus: The keyboard shortcut for a user interface component is only active when that component has focus.	No shortcut key functionality is implemented on the website. Therefore, this requirement is not applicable.

24	<p>5.2.24 For each time limit that is set by the content, at least one of the following is true:</p> <ol style="list-style-type: none"> 1) Turn off: The user is allowed to turn off the time limit before encountering it; or Adjust: The user is allowed to adjust the time limit before encountering it over a wide range that is at least ten times the length of the default setting; or 2) (b) Extend: The user is warned before time expires and given at least 20 seconds to extend the time limit with a simple action (for example, “press the spacebar”) and the user is allowed to extend the time limit at least ten times; or 3) (c) Real-time Exception: The time limit is a required part of a real-time event (for example, an auction) and no alternative to the time limit is possible; or 4) (d) Essential Exception: The time limit is essential and extending it would invalidate the activity; or 5) (e) 20 Hour Exception: The time limit is longer than 20 hours. 	<p>No time-limit-based content or functionality is implemented on the website. Therefore, the requirement related to adjustable or extendable time limits is not applicable.</p>
47	<p>5.2.47- For Web pages that cause legal commitments or financial transactions for the user to occur, that modify or delete user-controllable data in data storage systems, or that submit user test responses, at least one of the following is true:</p> <p>Reversible: Submissions are reversible.</p> <p>Checked: Data entered by the user is checked for input errors and the user is provided an opportunity to correct them.</p> <p>Confirmed: A mechanism is available for reviewing, confirming and correcting information before finalising the submission.</p>	<p>No activity related to legal commitments or financial transactions found on the website.</p>
